Item	Actions Arising and Key Decisions	Lea d
1.	Welcome and Introductions	SB
2.	Concertus Project Update	AT
	AT advised that whilst she has been continuing with work on the project, it has been difficult to progress without the authorisation to start work on site. The project is now at significant risk and is now approximately 3 months behind schedule due to the legal agreement delays.	
	Gas main - Cadent require one months' notice so that they can accompany the contractor on site to identify the exact location before works start. Given the current situation with the Licence to Occupy, construction will not start before September – and only if the licence is signed. The contractor will require a minimum four-week lead in period.	
	Licence to Occupy – LTC are concerned that the Ness land ownership transfer from WDC/ESC includes the sea defence. SB advised that a Parish Council is not legally permitted to incur expenditure on coastal erosion or sea defences. Therefore, it needs to be determined who will be responsible for this. EC noted that LTC have been made aware that Coastal Partnership East responsible. Cllr Taylor will call an emergency meeting of the Full Council on the 13 th August to discuss the Licence to Occupy, the legal status of the site and process for signing off the technical design Representative from the Steering Group will attend.	
	Project timeline – the project was initially expected to take 6 months to complete and it is inevitable that there will be project slippage. As a condition of the funding, the works had to be completed and funding spent by December 2019. This project is now not expected to complete until potentially March 2020. There are increased risks that the site will be subject to harsh weather due to the time of year and the build will be running into the winter period. Ben Porter will need to contact the Coastal Communities Team as a matter of urgency to seek advice on that delay on the project ESC as the grant recipient express real concern that failure to meet the conditions of the funding will not abode well for Lowestoft as a whole to draw in other funding. There is also a risk that the funder could ask for the funding back as we have not met their conditions. AT advised that the order needs to be placed at the end of August at the very latest to start works.	

It was noted that ESC resources have only been committed until December as the project was anticipated to be completed by this date Contracts are also at risk of being breached with Concertus and Allen Scott Architects who are contracted to complete by the end of December 2019. RB noted that Concertus have already noted additional charges are likely. There is also the risk of now limiting ESC ability to draw in additional funding such as Our Heritage and LTC drawing in Arts Council funding for Ness Point. The delay with CCF funding will not give confidence to these other funder and it will also prevent the likelihood of Poetry People delivering their proposed heritage activity work by May 2020 or delivering augmented reality work by summer 2020, CCF is a match contribution to this which is the other risk. If CCF is re called then match element for these projects will be lost. Cost status – project at significant risk of overspend due to contracts being breached, and risk of CCF funding being withdrawn. Pavilion - A concept for a shelter was presented in the original business case to the funder, and some research through stakeholder engagement has been carried out to determine interest of use by different stakeholders. The detailed design is part of the builders contract and therefore if we decide to remove the pavilion once in the contract well ble liable for the fer cost. Conce the contractor has created a final design for the pavilion, AT will present to the steering group and LTC Full Council for comment. SB stated that the concept design has not been signed off by UTC. AT advised that all final design of the key structures will be presented to the Steering Group for final approval and then Full Council if that is the preferred approach agreed on the 13 th August. Outside of his process any major design variations from the contract will incur additional cost. Rights of Way – AT is meeting with SCC with regards to RoW on the site during construction following the meeting. The Steering Group agreed with the p			
Concertus and Allen Scott Architects who are contracted to complete by the end of December 2019. RB noted that Concertus have already noted additional charges are likely. There is also the risk of now limiting ESC ability to draw in additional gruph as Our Heritage and ITC drawing in Arts Council funding for Ness Point. The delay with CCF funding will not give confidence to these other funder and it will also prevent the likelihood of Poetry People delivering their proposed heritage activity work by May 2020 or delivering augmented reality work by summer 2020, CCF is a match contribution to this which is the other risk. To move this forward ESC are waiting LTC to review the Toilet feasibility study.		To move this forward FSC are waiting LTC to review the Toilet feasibility study	

4.	Funding CCF - BP will be contacting CCF today to advise of the project delay. The outcome of this is unknown, but there is a major risk that the funder could not agree to the extension or ask for the funding back which would compromise the project and compromise Lowestoft ability to draw in any future funding from CFF,HE for wider HAZ, Heritage Lottery, Arts Council as confidence will be damaged	BP
	Our Heritage – Subject to Our Heritage funding being secured Immersive Creative and Poetry People will be appointed to deliver augmented reality work and heritage activity (GRIT 2020). An meeting has been held with Immersive Creative, and another will be held today with Poetry People this afternoon with regards to drawing out the info required to feed into the Our Heritage funding bid.	
5.	 Review of Actions Toilet feasibility study – SB advised that this is currently with several committees to see how the town council would like to proceed with the concept of toilet provision. LTC to take forward. Updated require at August Steering Group meeting Review of noise assessment - SB to follow up and take forward Updated required at August Steering Group meeting Licence to Occupy – negotiations continuing. LTC & ESC to resolve. Updated required ahead of the next meeting Public art – LTC to discuss options and deliver by CCF match element by December 2019. Update required at 19th August Steering Group meeting KE to send copy of HJ's public art feasibility options to LTC. Updated required at August Steering Group meeting BP to contact CCF with regards to project timescale. Updated required ahead of the next meeting 	SB
6.	A.O.B Immersive Creative – EC would like the Steering Group to make a decision as to who will create the content for the site.	All

Next meeting: 10am, 19th August 2019, Riverside
