

Dear Council & Councillors for Harbour and Normanston

There is a steep and winding public footpath from the A47 leading down to the Lighthouse Diner and as you can see from the attached, albeit limited quality photo, the area is overflowing with litter and fly-tipping, particularly bad around the entrance point from the A47 and around and underneath the wooden structure used to store waste bins - somewhat ironic.

Same applies to the Lighthouse Score although no picture yet but will take one as evidence.

I am disgusted and ashamed to see these areas so neglected by Lowestoft Town Council. And you should be ashamed yourselves, because it adds to the overall sense of this town in steep decline thanks to anti-social behaviour and councillors unwilling to open their eyes and address this sort of blight. There are six councillors for this ward, yet has nobody noticed this problem? I'm very disappointed with you all because you're letting your constituents and visitors down.

So come along, please get this area cleaned up and *kept* clean.

Thank you,
