Pumping Station Refurbishment – Fen Park TPS Lowestoft

Dear Anglian Water Customer

The pumping station located at Fen Park requires some essential maintenance to be carried out. This work will begin on Wednesday 29th May 2019. The work will be carried out between the hours of 07:30 – 17:30pm.

Due to the nature of the work and equipment required, there will be an increase in traffic to and from the site while the work is carried out. You will also see Anglian Water and contractor vehicles parked outside the pumping station for the duration of the work. There will potentially be restricted access during peak times, which we will try and keep to a minimum. If you have any particular access problems or requirements, please do not hesitate to contact us using the details below and we will try to accommodate wherever possible.

This work will not impact on the use of your facilities and there will be no loss of services. We estimate that the work will be completed by Monday 17th June 2019; however we may complete the work prior to this date.

We are sorry for any inconvenience caused to residents and road users whilst we complete this essential work. If you require any further information regarding the work being carried out by Anglian Water, please contact our Site Team Leader Steve Hart on 07860859388 or myself Gary Hart on 07860 859387.

For further updates you can visit In Your Area on Anglian Water's website <https://inyourarea.digdat.co.uk/AnglianWater>.

Thank you for your patience and apologies for any inconvenience this work may cause.

Yours Sincerely

Gary Hart
