

Item 13.5b – Anglian Water working on Fen Park pumping station

Anglian Water will be carrying out major refurbishment works to the pumping station within Fen Park. This was planned for end of May but due to nesting swans has been put back to start 26th June 2019. There will be cranes on site and a work zone set up, the footpath will be closed near to the entrance of the pumping station for the duration of the works expected to be around three weeks. Load bearing assessments etc have been completed, Anglian Water are aware that if any damage occurs they will be liable. All precautions have been undertaken and assurances that no contamination should occur to the pond water.

Many thanks
