

MEETING PAPER

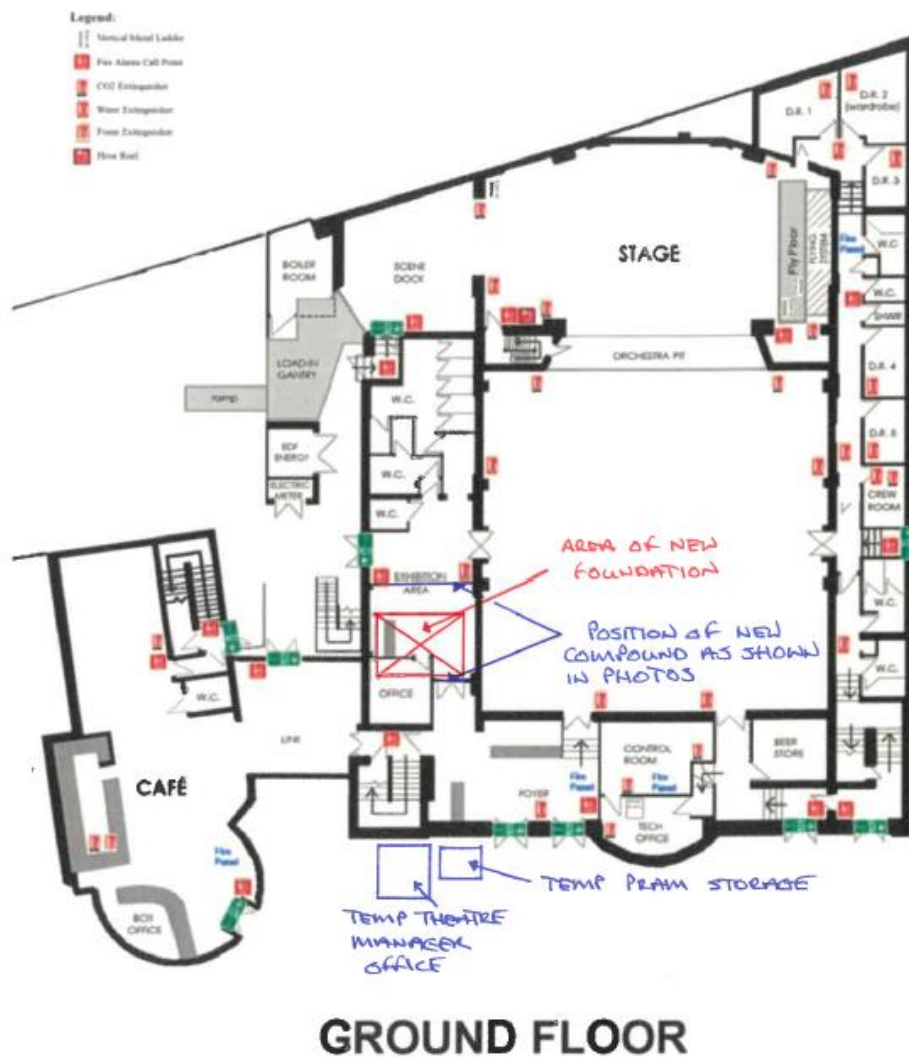

Subject: 228.1b. Installation of front of house office and buggy store

Meeting: Extraordinary Full Council

Date: 4 February 2025

~~CONFIDENTIAL~~/NON-CONFIDENTIAL

The new and increased size of the foundation for the lift means there is a requirement to relocate the management office (see plan below).

Theatre management must have a line of sight to the fire alarm panel, and the cables of the Theatre's CCTV cameras need to be rerouted so the Theatre Manager can monitor the CCTV during use of the Theatre. This has created the requirement for a temporary Theatre Manager's office. A picture of the location of the new site hoarding is as follows:

The existing Theatre Manager's office is pictured as follows:

This image shows where the cables for the CCTV will have to run for the new management office.

This image shows blocked off doors to allow hoardings to be erected as shown on the floor plan.

Foyer area showing routes for CCTV and data cables.

There is also a requirement for a temporary pram store. This used to be situated in the foyer which is no longer there. The increased size of the lift foundations has again affected the location of the pram store, and other areas cannot be used due to the positioning of fire escapes (refer to above plan). It is proposed to site the temporary pram storage next to the temporary Theatre Manager's office.
